SUBJECT: QUALITY ASSURANCE AUDIT  
ASBESTOS DUMP SITE  
ENFORCEMENT OVERSIGHT ASSIGNMENT  
EPA WORK ASSIGNMENT NO. 10-26A2.0  
EPA CONTRACT NO. 68-01-7250

Attached are responses to recommendations provided in Report No. Asbestos Dump-01 (dated September 16, 1986) transmitted per your letter of October 20, 1986. The report was received two days after the oversight activities were completed. Ebasco will oversee the collection of two more rounds of groundwater samples to be conducted over the next few months and will split samples with the PRP's consultant during those sampling efforts. Accordingly, page 5, paragraph 2.7 of the Field Sampling and Analysis Plan (FSAP) for the Asbestos Dump Site has been revised to incorporate recommendation number 2 in the report. Please update your copy of the FSAP by substituting the enclosed page 5 for page 5 in your copy of the FSAP.

If you have any questions regarding this correspondence please do not hesitate to contact me at (201) 460-6509.

ASBESTOS DUMP SITE  
RESPONSES TO AUDIT FINDINGS

The following responses address recommendations provided in the Report No. Asbestos Dump - 01, dated September 16, 1986

1. On September 16, 1986 the Ebasco site geologist was reminded to log the phone calls made to the Sample Management Office (SMO) to inform them of sample shipment in compliance with CLP procedures. The SMO will in turn contact the receiving laboratories.
2. Oversight of the sampling activities conducted by Fred C. Hart Associates (HART) and splitting of samples with Hart by Ebasco was completed on October 20, 1986. However, additional splitting of samples with Hart is scheduled to be performed over the next few months. In order to provide proper guidance to field personnel concerning trip blanks and field blanks the Field Sampling and Analysis Plan (FSAP) will be revised. A replacement page for the FSAP is being provided to the Quality Assurance Manager with this correspondence.
